7. Integrating Zoho Creator with Zoho CRM via Connections and APIs

Aim

To design, develop, and integrate a custom Gym Membership Enrollment form in Zoho Creator with Zoho CRM using authenticated connections and automated workflow actions, enabling seamless lead generation and data synchronization upon successful form submission.

Procedure

1. **Application Setup:** Log into the Zoho Creator platform and create a new application titled Gym Membership Enrollment & Front Desk Management.

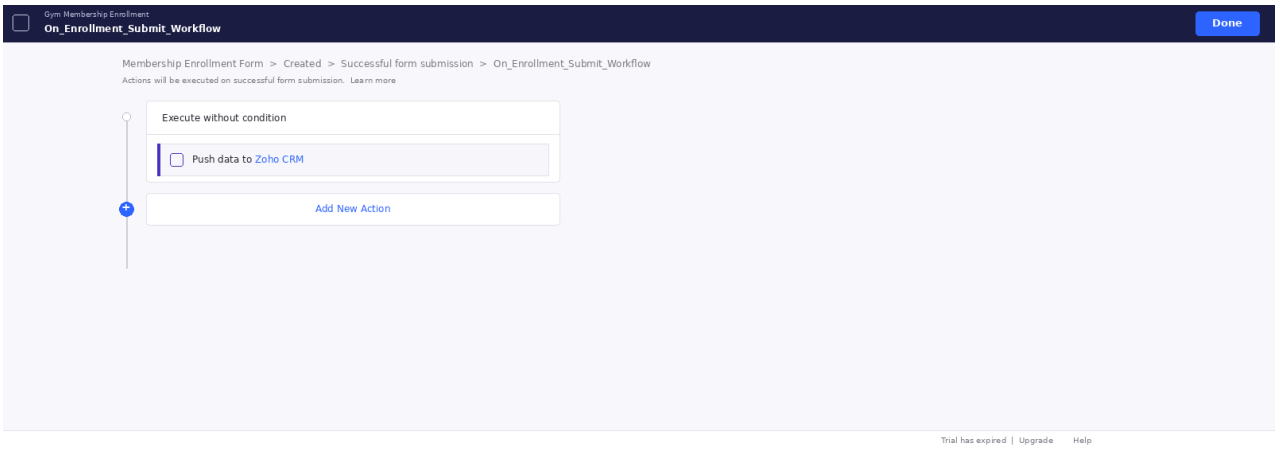

2. **Form Design:** Construct the Membership_Enrollment_Form incorporating Section-A (Member details: Member Name, Age, Membership Type), Section-B (Contact details: Email, Phone, Address, Emergency Contact Name), Section-C (Membership and fitness preferences: Membership Plan, Preferred Activities, Fitness Goals / Medical Notes) and Section-D (Scheduling and health declaration: Preferred Start Date, Preferred Workout Slot, Health Declaration Waiver).

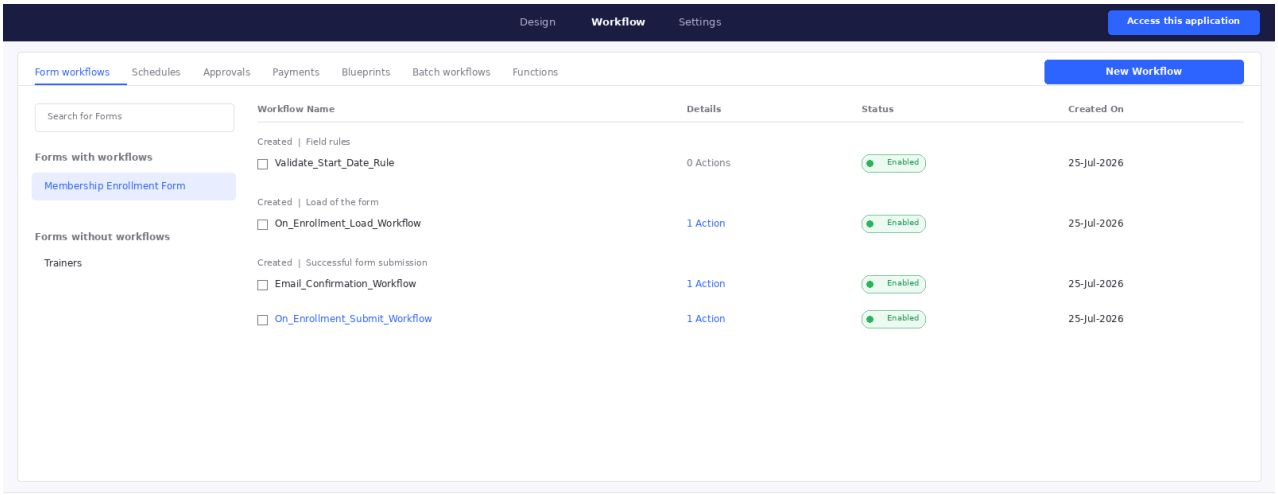

3. **Integration & Authentication:** Navigate to App Preferences > Manage Integrations. Select Zoho CRM and establish a secure OAuth connection. Verify that the connection badge displays Connected.

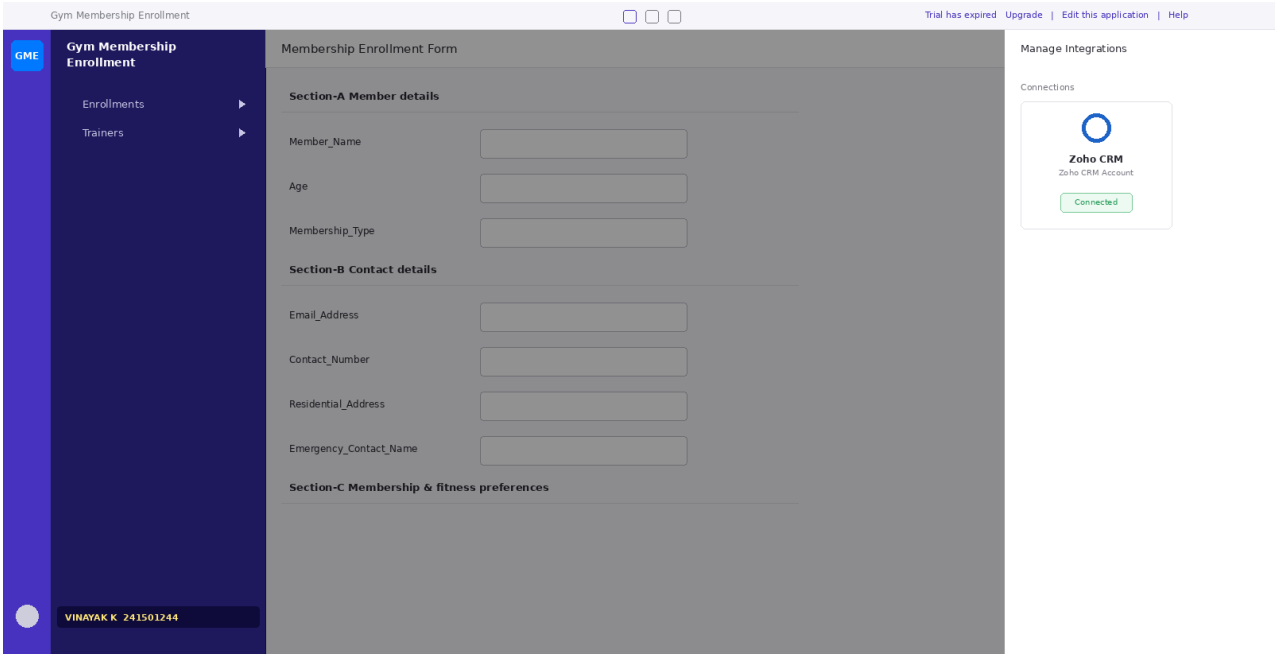

4. **Workflow Configuration:** Go to the Workflow tab, select the Membership Enrollment Form, and create a new workflow named On_Enrollment_Submit_Workflow under the trigger event Created > Successful form submission.

5. **Action Mapping:** Add an integration action inside the execution block to push member data directly to the Zoho CRM modules, then toggle the workflow status to Enabled.

Screenshots

Result

The Gym Membership Enrollment application was successfully created and integrated with Zoho CRM. Whenever a prospective member fills out and submits the enrollment form in Zoho Creator, the workflow triggers automatically, successfully executing the API push action to synchronize member details into Zoho CRM in real time.
