9. Exploring AI-Assisted Features and Built-in Analytics (Zia) in Zoho Creator

Aim

To explore the AI-assisted features of Zoho Creator by using Zia, the built-in AI Build Agent, to generate analytics from a plain-English prompt for a gym membership system, and to interpret the resulting dashboard of key figures, member status summaries and charts, so that membership plans, payment statuses and class attendance can be analysed without writing any code.

Procedure

1. Sign in to Zoho Creator and open the **gym membership system** application (with its Member Registrations, Membership Plans, Trainer Profiles, Class Schedules, Attendance Logs, Payments & Invoices and Equipment Inventory modules) in the **Design** view. The **Workflow** and **Settings** tabs sit beside it.
2. Look at the **Build Agent** panel on the left. Zia greets the user with *"Hi, I'm your AI developer. What would you like me to build today?"* and offers a prompt box at the bottom.
3. Type the analytics request in natural language: *"Analyse and create visualizations of membership plans, payment statuses, and class attendance."* and send it.
4. Zia shows *"Pulling your report together"* and lists its **Proposed changes** and **Actions**. Confirm by instructing it to *"do the analytics"*; Zia then shows *"Processing..."* while it builds the dashboard.
5. Review the generated **Dashboard** page in the design canvas. Zia creates four summary cards: **Total Revenue** ($4,820.00), **Total Collected** ($3,965.50), **Avg. Monthly Fee** ($49.90) and **Total Outstanding** ($854.50).
6. Check the **Status** section, which summarises members as **48** Active, **6** Expiring Soon, **3** Frozen and **2** Cancelled, and the **Quick Links** for Add New Member, Add New Class Booking, Add New Membership Plan and Add New Trainer Profile.
7. Examine the charts: **Plan Type by Monthly Fee** (Platinum, Gold, Silver) and **Payment Status by Amount** (Overdue, Pending, Paid).
8. Use the **Page Customization - Web** panel on the right to adjust how the page is displayed (Card or Plain) and its margins.
9. Click **Access this application** to open the live dashboard, and check that the figures, status counts and charts display correctly.
